SUMMARY

Passionate and driven developer with strong expertise in frontend development for web applications and backend development for bots, web platforms, and mobile apps. I enjoy creating user-friendly, visually appealing interfaces and building robust, scalable backend systems. I focus on writing clean, maintainable code and continuously improving my technical skills. I actively contribute to team projects, take on real-world challenges, and aim to deliver high-quality solutions while growing further as a professional developer.

STRENGTHS AND SKILLS

Programming Languages: JavaScript, TypeScript, C++,

Advanced Technologies: Blockchain, AI-Chat Bot, Prompt Engineering

Libraries & Tools: HTML, HTML5, CSS, Bootstrap, Tailwind CSS, Material UI, JavaScript (ES6+), React, Redux, Next.js, Node.js, Express.js, Postman Collections, Git & GitHub, REST APIs, GraphQL, Third-Party APIs, JWT, Websockets, Socket.io, Webhook, Vite, Webpack

Database : MongoDB, Supabase, Firebase, Redis, MySQL, PostgreSQL

Others: Quality Management, Time Management, Communication Skills

PROJECTS

VentMe Chat Application

OCT 2025 – Nov 2025

Project overview:

Developed a real-time chat application that enables users to craft personalized messages and communicate seamlessly. Implemented backend systems to handle chat requests, message storage, and real-time updates across web and mobile platforms. Ensured secure data handling and efficient performance for multiple concurrent users.

My Roles:

Back-End Developer:

- Designed and implemented RESTful APIs for chat request handling, message sending, and retrieval.
- Integrated WebSocket/socket.io for real-time messaging between users.
- Managed user authentication, roles, and chat permissions securely.
- Implemented database schema and queries to efficiently store and retrieve messages.
- Ensured backend scalability and reliability for smooth user interactions.

Algora Media Website & Admin Panel

Sep 2025 – Oct 2025

Project overview:

Developed the website for Algora Media, a marketing agency, including a custom AI-powered chat module and an admin panel for managing dynamic content. The chat module provides users with marketing plans and ideas through AI-driven responses, while the admin panel allows content updates, campaign management, and website customization without coding.

My Roles:

Full-Stack Developer:

- Built the AI chat module backend, integrating logic to generate marketing suggestions in real-time.
- Developed RESTful APIs to handle chat requests, sessions, and AI responses efficiently.
- Created a responsive frontend for both the chat module and admin panel.
- Designed and implemented the admin panel for dynamic content management, allowing marketing campaigns, website sections, and resources to be updated without developer intervention.
- Managed database schemas for storing chat histories, user data, and dynamic website content securely.
- Optimized backend performance for real-time interactions and seamless content updates.

EXPERIENCE

Intern MERN Developer

IIFA Tech

March 2025 – June 2025

Lahore, PK

Associate Software Engineer

Zentix Tech

July 2025 – Present

Lahore, PK

EDUCATION

Riphah University School of Computing & Innovation

B.S. in Computer Science

Lahore, PK

OCT 2021 – June 2025

Rewards

- Runner-up Code Master 2023-24 Intra-City University
- Winner of Zindagi Innovating Project Inter University
- Winner of RC3 2024 Inter University
- Runner-up of Innovating Hub Regional 2024
